Inside The Numbers

Espinoza connected on 40% of punches and averaged 74 punches thrown per round. 37% of Espinoza's power punch connects were body shots. Vazquez landed some quality punches over the first three rounds, but the writing was on the wall once Espinoza hurt him to the body in round three. Espinoza hurt Vazquez again to the body in the fourth round, putting Vazquez in survival mode from that point on. The end came at 1:47 of the seventh round, when the referee waved it off because he'd seen Vazquez absorb enough punishment.
